CIMS Process

This option will provide the current producer information from the FSA SCIMS database, and most recent crop and acreage information from the FSA compliance database. The FSA acreage can be either 2006 or 2007 information depending upon the timing of the request. CIMS will return crop and acreage information for the current crop year (2007) if the Producer has reported it to FSA. If the current year is not available, CIMS will return crop/acreage information for the prior crop year (2006, if available from FSA). SCIMS and Compliance will be called only for the primary insured. No calls to SCIMS or Compliance for SBIs will be performed for Type 14 record requests.
